Listing Honors and Awards on your resume gives you the edge you need to reach the interview stage and beyond. When looking for a first job, many students find that their resume gets lost in a pile and barely gets considered. Especially when there are countless other applicants with similar qualifications and skills. Your resume tells your story, and demonstrates why you are the right person for a position. The Awards and Honors section should accompany your Qualifications and Experience, adding extra value to your resume. Using an online resume builder is a simple and effective way of writing a winning resume which will get you through to the interview stage. Why include Honors and Awards on a resume. Should I include awards on my resume?
