Create your digital reality. View your design models of buildings or objects in the context of the real world. Place them within our collection of accurate 3D maps of cities, towns and landscapes, or view designs within your own 3D maps by uploading your reality capture environments to the platform. 3D City Catalog.Â New cities for the catalog New locations will become available for license from our 3D catalog. These cities, towns, and landscapes are derived from our asset collection of over 3.6 petabytes. Supermesh fusion The complete and automated fusion of mesh models from multiple sensors, data sources, and file types. Drone Capture Data modeling from drone LiDAR and photogrammetry. Artificial Intelligence for the Real World. by.Â Of the 152 projects we studied, the most common type was the automation of digital and physical tasksâ€”typically back-office administrative and financial activitiesâ€”using robotic process automation technologies. RPA is more advanced than earlier business-process automation tools, because the â€œrobotsâ€ (that is, code on a server) act like a human inputting and consuming information from multiple IT systems.Â Some organizations were planning to hand over routine communications to machines, while transitioning customer-support personnel to more-complex activities such as handling customer issues that escalate, conducting extended unstructured dialogues, or reaching out to customers before they call in with problems.
