

Curriculum Vitae
NICHOLAS G. BLURTON JONES

RESEARCH INTERESTS

Behavioral ecology of foraging peoples: demography, subsistence, children's work, reproductive strategies, and wherever they lead us into understanding life histories, and more complex aspects of social life.

e-mail: nickbj@ucla.edu

EDUCATION

1958-1961 Ph.D., University of Oxford, Zoology

1954-1958 B.S., University of Reading, Zoology, Botany, Psychology
Special honors Zoology

ACADEMIC APPOINTMENTS

1999 - present Professor emeritus, University of California Los Angeles.

1981-1999 Professor of Education, Anthropology, Psychiatry
University of California, Los Angeles

1972-1981 Senior Lecturer, University of London, Institute of Child Health

1963-1972 Lecturer in Developmental Ethology, Department of Growth and Development,
University of London, Institute of Child Health

1963 Fulbright Fellow, Johns Hopkins University Medical School

1962-1963 Temporary Lecturer, Department of Psychology,
University of Bristol

1961-1962 Departmental Research Officer, Department of Zoology, University of Oxford

FIELDWORK

1990, 1991, 1992, 1995, 1997, 1999, 2000. Censuses, anthropometry, and reproductive history interviews with Hadza women, Tanzania.

- 1989 Hadza childrens subsistence activity and food sharing, and parent-child interaction, Tanzania.
- 1988 Foraging returns of !Kung women and children, Botswana.
- 1986 Subsistence and food sharing among the Hadza.
- 1985 Census of Eastern Hadza (with L.C. Smith)
- 1984 Pilot visit to Hadza and worked on 1977 census data (with L.C. Smith)
- 1982 Exploration of the Akie, and pilot visit to the Hadza (with L.C. Smith)
- 1974 Navajo Mountain, Utah, principal investigator visit to J. Chisholm's research on Navajo mother-infant interaction.
- 1974 Malaysia, various areas visited to select rural study site for research on mother-infant interaction.
- 1970 Behavior of !Kung children, Ngamiland, Botswana, and studies of !Kung knowledge of animal behavior.
- 1960 Breeding behavior of Sabine's Gull, Bering sea coast of Alaska.
- 1957 Zoological studies in Spitsbergen. 1954. Ornithological studies in central Iceland.

Nicholas Blurton Jones & Frank W. Marlowe - 2002 - *Human Nature* 13 (2):199-238.details. Humans have a much longer juvenile period (weaning to first reproduction, 14 or more years) than their closest relatives (chimpanzees, 8 years). Three explanations are prominent in the literature. (a) Humans need the extra time to learn their complex subsistence techniques. (b) Among mammals, since length of the juvenile period bears a constant relationship to adult lifespan, the human juvenile period is just as expected.Â Adam G. Jones, Nicholas L. Ratterman & Kimberly A. Paczolt - 2012 - In E. Svensson & R. Calsbeek (eds.), *The Adaptive Landscape in Evolutionary Biology*.
