0060208171

Although Monarch butterflies may well qualify as one of the most beautiful and majestic of butterflies on the planet today, entomologists, students and enthusiasts diligently persist with their studies to bring out several more interesting facts about them to the world. Here are some of those interesting data. Habitat and Species. Among the two species of Monarch butterflies, the one in North America differs from the one you will find in South America, but the Caribbean is home to both species. You can also see them in Australia, New Zealand, and several Islands lying between Australia and Tah
