Introduction to Financial Accounting. Financial accounting is a specialized branch of accounting that keeps track of a company's financial transactions. Using standardized guidelines, the transactions are recorded, summarized, and presented in a financial report or financial statement such as an income statement or a balance sheet. Companies issue financial statements on a routine schedule. The statements are considered external because they are given to people outside of the company, with the primary recipients being owners/stockholders, as well as certain lenders.

Introduction to Financial Accounting. by Henry Dauderis & David Annand Edited by Athabasca University. Version 2017 " Revision C. 2 It should be noted, however, that at the introductory level, there are no significant differences in how IFRS and ASPE are applied. 6

Introduction to Financial Accounting. " reliability means that others are able to confirm that the information faithfully represents the economic activities of the business. " reliability is available to decision makers in order to be useful. " understandability is clear and concise. Financial accounting is the process of recording and summarizing the financial transactions to present them in the form of financial reports including balance sheet, income statement, and statement of cash flows, etc. Recording and summarizing are the two main tasks that financial accountants do most of the time in their accounting works. Recording: refers to the process of analyzing everyday business events in day to day operation then posting into the accounting system. It includes recording the transactions of sales, purchasing of inventory, buying fixed assets and other everyday expenses, Introductory accounting does not change often so future updates should be minimal. The authors used the year 2015 in most of the problem and examples. This might make the text "seem" out-of-date in a few years. " Table of Contents. Introduction to Financial Accounting.
