Executive Committee, Western Economic Association, 1992-1995.

Western Representative, Committee on the Status of Women in Economics Profession, American Economic Association, 1989-1991.

You must provide a registered office address during your application to incorporate a company. A registered office address refers to the place where all communications and notices to the company are addressed to, and the place where the company's register and records are kept. Can be the same address as the registered office (you can also [link](#) the service address to your registered office so that it will automatically change whenever the latter is moved). The majority of individuals prefer to use an address that is not their place of residence due to the public nature of this information. Using an alternate one allows individuals to protect the privacy of their home from unwanted visitors and unsolicited mail. Address can be changed at any time. Companies House must be informed of any change of address. A registered office address is an official correspondence address that every limited company (and LLP) is legally required to provide during the incorporation process and maintain throughout its existence. The purpose of a registered office is to provide Companies House, HMRC, and other government bodies with an official address where statutory communications and legal notices can be securely delivered.
