Preface	
<b>1 Monohybrid inheritance (1)</b>	1
1.1 Mendel's experiments and conclusions	1
1.2 Particulate inheritance explained in modern terms	5
1.3 The standard monohybrid cross	7
1.4 The monohybrid backcross or testcross	8
1.5 The physical basis of the Law of Segregation	9
1.6 Summary	12
Key words	12
Answers	13
Problems 1-12	13
<b>2 Monohybrid inheritance (2)</b>	16
2.1 The origin of new alleles	16
2.2 Phenotypic effects of mutant alleles	17
2.3 Multiple alleles	20
2.4 Incomplete dominance and codominance	23
2.5 Lethal alleles	25
2.6 Mendelian ratios and probability	26
2.7 Pedigrees	28
2.8 Summary	29
Key words	30
Answers	30
Problems 13-25	31
<b>3 Dihybrid inheritance</b>	35
3.1 Mendel's experiments and conclusions	35
3.2 The dihybrid testcross	37
3.3 The physical basis of the Law of Independent Assortment	38
3.4 Interaction between genes at different loci	40
3.5 Characters controlled by more than two gene loci	43
3.6 Summary	46
Key words	47
Answers	47
Problems 26-40	47

---

---

<b>4 Sex determination and sex linkage</b>	52
4.1 Sex determination	52
4.2 Sex linkage in <i>Drosophila</i> and humans	56
4.3 Inactivation of X-chromosomes	59
4.4 Summary	60
Key words	61
Answers	61
Problems 41–50	63
<b>5 Genes and chromosomes</b>	66
5.1 Linked genes	66
5.2 Crossing over	68
5.3 The dihybrid backcross involving linked genes	71
5.4 The chi-square test	74
5.5 Chromosome mapping	76
5.6 The history of the chromosome theory of heredity	79
5.7 Chromosome mutations	81
5.8 Summary	87
Key words	89
Answers	89
Problems 51–65	90
<b>6 Population genetics</b>	97
6.1 Genes in populations and the Hardy–Weinberg equation	97
6.2 Applications of the Hardy–Weinberg equation	99
6.3 The Hardy–Weinberg equilibrium	101
6.4 Disturbances of the Hardy–Weinberg equilibrium	103
6.5 Selection against deleterious recessive alleles	106
6.6 Effects of human activity on allele frequencies in natural populations	107
6.7 Polymorphism and evolution	110
6.8 Summary	111
Key words	111
Answers	112
Problems 66–75	113
Tests A–H	116
Answers to problems	126
Answers to tests	141
Appendix: table of chi-square values	145
Index	146

---

# Index

- agouti 21  
albinism/albino 8, 20, 21, 42, 102  
allele 5, 16-20  
allele, lethal 25-6, 83, 105  
allele, mutant 17-19, 72, 106  
alleles, multiple 20-2  
artificial selection 104  
autosome 52, 84  
backcross 8, 71  
Barr body 60  
blood groups 20, 100-1  
cancer 17  
centromere 11, 83, 84  
chiasmata 80  
chi-square test 74-6, 145  
chromatid 9, 11, 68  
chromosome 9-11, 38-40, 53, 70  
chromosome, sex 52, 55, 84  
chromosome mapping 76-9  
chromosome theory 79-81  
codominance 24-5, 100  
continuous variation 44-5  
criss-cross inheritance 58  
crossing over 68-71, 82  
crossover value 78  
cryptic colouration 107  
cystic fibrosis 20  
cytogenetics 81  
cytoplasmic inheritance 16  
deletion (deficiency) 82-3  
dihybrid 35-8, 71  
diploid 9, 84  
discontinuous variation 43, 45, 110  
dominance/dominant 2, 4, 5, 9, 18, 23, 25-6  
dominance, incomplete 23, 45  
Down's syndrome 84  
duplication 82-3  
environmental variation 45  
epistasis 42-3  
evolution 86, 107, 109, 110  
gene 5, 16, 79-81  
gene locus 9, 16, 40-3  
gene pool 99  
gene symbol 5, 16, 26, 56, 67-8, 77  
genes, complementary 43  
genetic drift 103, 104  
genetic engineering 86  
genotype 5  
germ line 17  
gonads 54  
haploid 9, 84  
Hardy-Weinberg equation 97-102, 104, 106  
Hardy-Weinberg equilibrium 101-6  
Hardy-Weinberg Law 106  
hemizygous 56  
heterogametic 55  
heterozygote/heterozygous 5, 6, 8, 67, 106  
homogametic 55  
homologous/homologue 9, 40, 66-8, 83-4  
homozygote/homozygous 5, 6, 8, 38  
inbreeding 103, 106  
industrial melanism 109  
inversion 82  
karyotype 52, 54-5  
Law of Independent Assortment 36, 38-40, 66, 72  
Law of Segregation 5, 9  
linkage 66-8, 80  
linkage groups 81  
locus, *see* gene locus  
meiosis 6, 10, 38-40, 52, 68, 82-5  
melanic 107-8  
Mendelian ratio,  
3:1 4, 7, 12  
1:2:1 5, 7, 12, 24, 29  
1:1 8, 12  
2:1 26, 30  
9:3:3:1 36, 40-2, 46  
1:1:1:1 38, 46, 71-2, 74  
9:3:4 42, 46  
9:7 43, 46  
monohybrid 5, 7, 8  
monosomic 84  
mutagen 82  
mutant/mutation 17, 103-4  
mutation, chromosome 18, 54, 81-6  
mutation, gene 18  
mutation, somatic 17  
natural selection 104, 106, 109  
non-disjunction 84  
non-Mendelian inheritance 16  
non-recombinants 70-1  
pedigree 28-9  
phenotype 5  
pleiotropic/pleiotropy 20  
polygenic inheritance 44, 107  
polymorphic/polymorphism 110  
polyploid/polyploidy 9, 86  
probability 6, 26-8, 97-8  
Punnett square 6, 27, 36-7, 41, 45, 97  
pure breeding 4, 5  
quantitative character 44  
recessive/recessivity 2, 4, 5, 9, 18  
reciprocal 2, 11, 56  
recombinants 70-3  
recombination 71  
recombination frequency 77  
segregation 6, 9-11, 36, 39, 40, 52, 54, 85  
sex determination 52-5  
sex linkage 56-9  
sickle cell anaemia/trait 19, 25  
significance, statistical 75  
testcross 8, 37-8  
thalassaemia 104  
translocation 82, 84-5  
triploid 84-5  
trisomic 84  
wild type 16  
X-chromosome 52-60, 77, 84  
X-linkage 56, 59, 60  
Y-chromosome 52-9, 77, 84  
Y-linkage 56, 58

Essential Genetics book. Read reviews from world's largest community for readers. Every new copy includes access to the student companion website Updated ... We'd love your help. Let us know what's wrong with this preview of Essential Genetics by Daniel L. Hartl. Problem: It's the wrong book It's the wrong edition Other.
