Increase Your Chances of Getting Published If your manuscript has already been accepted by an editor and you have agreed to publication through the journal or press, it is simply wrong to withdraw your work without truly compelling reasons and doing so can result in penalty fees as well as a refusal to publish any of your writing. Compelling reasons can include recently discovered or finally confessed instances of academic or scientific misconduct, especially if publication might bring harm to more than the individuals responsible for the questionable activities, but my focus here is on situat PUBLICATION PROCESS INFORMATION Because the manuscript or paper may be in several different steps of the publication process, it is important to let readers know where the source is currently. Do not italicize this part of the citation. End with a period. If a university is cited, separate the publication process information and the name of the university with a comma (Â Note: if the manuscript or paper has been accepted for publication, do not use a year. Instead, use the term "in-press." Give the title of the Journal the paper was submitted, as you would in citing a journal article. Do not gaive the page numbers as they are not available until publication.Â Unpublished raw data from a study or untitled work. [Study Topic]. Unpublished raw data. La publication scientifique donne lieu Ã de nombreux ouvrages pour en comprendre les rÃgles. (Barass, 1990 ;Kinyoun, 2005 ;Lin J., 2011). Ceci est rÃvÃlateur de la difficultÃ Ã acquÃrir ce type de rÃdaction. ...Â ResearchGate has not been able to resolve any references for this publication. Join ResearchGate to find the people and research you need to help your work. 17+ million members. 135+ million publications.Â The content of the paper reflects the kind of work you have done: experimental, theoretical, computational. I have used, as a model, a typical Materials project: one combining experiment with modeling and computation to explain some aspect [Show full abstract] of material behaviour.

Note line numbers of text upon which your notes are based - this helps you find items again and also aids those reading your review. Keep images, graphs and data tables in clear view - either print them off or have them in view on a second computer monitor or window. Now that you have completed your preparations, you're ready to spend an hour or so reading carefully through the manuscript. Doing the Second Read-Through. This helps developing researchers improve their work and explains to the editor why you felt the manuscript should not be published. "When the comments seem really positive, but the recommendation is rejection" it puts the editor in a tough position of having to reject a paper when the comments make it sound like a great paper."
