

Bank Valuation & Value-Based Management: Deposit & Loan Pricing, Performance Evaluation & Risk Management

Jean Dermine
Published by McGraw-Hill,
NY, 2015
2nd Edition

Professor Dermine's book covers the full range of critical topics in banking today—valuation, pricing, and risk management. Analytical, complete, and relevant, this book is a gem! At a time of increased scrutiny of the banking industry, this volume uses an analytic approach that will serve the reader well for years to come. A must-read for anyone in the profession." Anthony M.

Santomero, Director, Citigroup; Former President, Federal Reserve Bank of Philadelphia; Senior Advisor, McKinsey & Company; and Richard K. Mellon Professor Emeritus of Finance, the Wharton School

Unlike banking textbooks that emphasise institutional arrangements in the banking world, the primary purpose of this book is to propose a sound valuation model for banks. Surprisingly, very few publications on the subject are available. Anchored in the fields of economics and finance, this book provides not only useful tools for valuing banks, but also an integrated value-based management framework for discussing managerial issues such as fund transfer pricing, risk-adjusted performance evaluation, deposit pricing, capital management, loan pricing and provisioning, securitization, and the

measurement of interest-rate risk. To create value in banking, it is necessary to first understand the drivers of value. A sound and explicit bank valuation model is, as shown in this book, a very powerful tool for evaluating decisions that enhance shareholder value. In short, the book provides rigorous foundations for discussing asset and liability management, the control of long-term value creation and risks in banks. The second edition incorporates a discussion of the significant impact of the Basel III regulations on capital and liquidity.

Jean Dermine is Professor of Banking and Finance at INSEAD, Fontainebleau. Docteur es Sciences Economiques from the Université Catholique de Louvain and MBA from Cornell University, he was a

Visiting Professor at the Wharton School, New York University, Dakar, Lausanne, Louvain, Luxembourg, and the Stockholm School of Economics.

As a consultant, he worked with international banks, auditing and consulting firms, national central banks, European Central Bank, Bank for International Settlements, HM Treasury, the OECD, the World Bank, the European Commission, and the Mentor Forum for the US Supreme Court and the European Court of Justice. Jean Dermine is co-author of the ALCO Challenge, a banking simulation used on five continents.
